convert videos using ffmpeg (avi to flv, mpg to 3gp)

error: Unknown encoder 'mp3' or Unknown encoder 'libmp3lame' fix:

```
sudo apt-get install libavcodec-unstripped-52
```

```
#!/bin/bash
```

```
# avi to flv
```

```
fname=test.avi          # input filename
vbrate=2048             # video bitrate
res=640x480            # video resolution
frate=20                # video framerate
acodec=libmp3lame # audio codec
abraterate=88          # audio bitrate
ach=1                  # audio channel
srate=11025            # audio sample rate
```

```
ffmpeg -i $fname -b ${vbrate}k -s ${res} -r ${frate} -acodec $acodec -
ac $ach -ab $abraterate -ar $srate ${fname}_${vbrate}_${res}_${frate}.flv
```

```
#!/bin/bash
```

```
# mpg to 3gp (for Nokia 6300)
```

```
fname=test.mpg          # input filename
vcodec=h263             # video codec
res=128x96              # video resolution
frate=15                # video framerate
acodec=aac              # audio codec
abraterate=80          # audio bitrate
ach=1                  # audio channel
srate=8000             # audio sample rate
```

```
ffmpeg -i $fname -s ${res} -vcodec ${vcodec} -r ${frate} -acodec ${aco
dec} -ac $ach -ab $abraterate -ar $srate ${fname}_${vcodec}_${res}_${frate
}.3gp
```
