## Virtualization With KVM On A Debian Lenny Server

<http://www.howtoforge.com/virtualization-with-kvm-on-a-debian-lenny-server>

<https://help.ubuntu.com/community/KVM/Virsh>

<http://virt-manager.org/page/RemoteDigest>

<http://wiki.libvirt.org/page/Tips>

```
apt-get install sasl2-bin libsasl2-modules
```

```
/etc/libvirt/libvirtd.conf
```

```
listen_tls = 0  
listen_tcp = 1  
tcp_port = "16509"  
auth_tcp = "sasl"
```

```
/etc/libvirt/qemu.conf
```

```
vnc_listen = "0.0.0.0"
```

```
/etc/default/libvirt-bin
```

```
libvirtd_opts="-d --listen"
```
